We had great food and fun....

Next event is the Thanksgiving Dinner. All families and friends are invited! The students will be making the food...

Please bring a pie for the pie

### **Teacher Martha's Class**

Elisha, God's helper traveled from town to town. His story is another way to see how God takes care of us. His friends built a room for him when he traveled through town. What a wonderful way to show God's love. We talked about how we can show love to those around us. The kids had some wonderful ideas and we prayed that God shows us other ways and when we can share.

In math we are continuing to work on numbers. The kids are getting good at their skills. We played piggy pennies and counting frogs which helps the kids with one to one and then putting the numbers in the correct order.

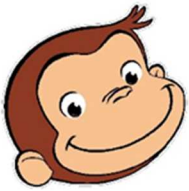

We have had a lot of art this week. We started our Christmas projects for our parents. This is a big project and I hope they keep the surprise, but if not, please act surprised on Christmas morning! When talking about surprises, we also talked about the difference between a secret and a surprise. Surprises are fun and secrets are not.

Hope you have a wonderful weekend! See you next week!

### **Curious Kinders News**

Dear Families,

This week we continued our study of the days of creation. The kids learned about how God created the plants, the lights in the sky, the birds of the air and the sea creatures. We also studied animals that live in the forest and trees. I happened to have pictures of our family a few years back when we were at Redwood camp meeting. The kids couldn't visualize trees so tall and big around as were described in our story book until they saw our family picture near a huge redwood tree. On Wednesday we learned about the food chain with just a few forest animals, and Spin from National Geographic took us on our tour of North American wild animals. We covered the letters S & T and the numbers 18 & 19. Have a great weekend! Mrs. Powell

### **Mrs. Davidson's Classroom**

We had a fun time at the Fall Back party last Saturday night! Thank you to everyone who came to eat and play games with us. We had early release on Wednesday and Thursday for parent-teacher conferences. It was a pleasure meeting with the parents of my wonderful students! Thank you for the honor of teaching your children.

In Bible, we're learning about the children of Israel taking over Canaan. We learned about the battle at Ai and the deception of the Gibeonites. In Science, we learned about seeds and how they grow. We dissected different fruits and counted the seeds. We learned that only one pineapple will grow from a seed and that it takes many years to grow a pineapple. We also saw that some fruits only have one seed, others have a few, and others have LOTS of seeds. We also planted two beans and are watching to see how the roots grow.

Next Thursday is our school Thanksgiving Dinner. All of the students and their families are invited and we hope you can join us.

### **Mrs. Messecar's Classroom**

We've been reading the book *Swift Arrow* by Josephine Cunningham Edwards. The kids don't want it put down. They have really enjoyed learning how a boy survived being captured by the Indians.

We had lots of math and grammar and vocabulary information going on this week. The 7th grade students are learning some very big words relating to the brain.

I have really appreciated getting to know my student's parents better this week. I have learned much more about my students and their family lives. You are some amazing people. Thank you for giving me the privilege of teaching your children.
