Local Church Budget

God's care for His own. Swallows can fly 7,000 miles without a chart, compass, or radio beam and land at the place they left six months before.

Spiders can make a silken rope, creating materials in their own chemical laboratory, very fine but strong enough for their own transport through the air.

Beavers are engineers, constructing without the aid of tools, cement, or precision instruments, bridges, tunnels, roadways, canals, and dams that last for years.

Bees, wasps, and ants solve their housing problem by building well-ventilated, weatherproof, well-designed, and practical apartment houses.

A young squid travels by jet propulsion. He swims by pumping water through a tube along his thin, streamlined body. When pursued, he can gather great speed, and he always jets backwards. When he gets going fast enough, he can set his fins at an angle and take off into the air. He has been seen to fly as far as sixty yards with one takeoff, leaving his foes far behind.

Can a Creator God like that take care of you and me? Of course! And shouldn't we respond to His loving care, most of which we take for granted, by living just as close to Him as we can? Yes!

Let us praise God for His blessings and respond in loving gifts for Him today.
