Tin Can Fun

Tin has been used for a long time!

The earliest known use of tin was around 3500 B.C. when the people of UR, (remember that's where Abraham and his family were called from) now modern-day Iraq, made bronze articles. Bronze is an alloy (metal mixture) of tin and copper.

Today tin is mainly used in tin plate (very thin sheets of tin around steel). Tin plate is used to make the tin cans that your family buys from the store filled with food.

How was tin used in Bible times (look for Bronze that alloy of tin and copper)?

• Exodus 25:3

• Exodus 26:11

• Numbers 21:9
